Presented to the Faculty of the  
College of Information and Communications Technology  
West Visayas State University  
La Paz, Iloilo City

In Partial Fulfillment  
of the Requirements for the Degree  
Bachelor of Science in Computer Science

by  
Gene Caleb C. Carbonilla  
Xyphrus Von Keith V. Caguan  
Joshreen D. Reyes  
Jirah Kate C. Solano

**CONTACT DETAILS OF THE SERENITEAM**

Here are the contact details of per member of the Sereniteam:

**Gene Caleb C. Carbonilla (Front End Developer)**  
Address: Brgy. Poblacion Delgado St., Calinog, Iloilo  
Contact Number: 09287308576  
Email: genecaleb.carbonilla@wvsu.edu.ph

**Xyphrus Von Keith V. Caguan (Back End Developer)**  
Address: Brgy. Anonang, Leon, Iloilo  
Contact Number: 09275594826  
Email: xyphrusvonkeith.caguan@wvsu.edu.ph

**Joshreen D. Reyes (Data Specialist)**  
Address: Brgy. Bacan, Cabatuan, Iloilo  
Contact Number: 09212271740  
Email: joshreen.reyes@wvsu.edu.ph

**Jirah Kate C. Solano (Data Analyst)**  
Address: Boracay Island, Malay, Aklan  
Contact Number: 09219931155  
Email: jirahkate.solano@wvsu.edu.ph

**TROUBLESHOOTING FOR POSSIBLE FIXING BUGS**

There is no need of troubleshooting for possible fixing bugs since the web application is static.

**FREQUENTLY ASKED QUESTIONS (FAQ)**

1. What is Syrene?  
*Syrene is a chatbot that can interact with users via text. Syrene can interpret user queries and give relevant responses quickly.*
2. Who will be the chatbot users?  
*Chatbot users may be anyone seeking help relating to mental heath.*
3. Are chatbots new?  
*No. Conversational chatbots have already existed for decades. Many failed attempts have been made in the past to develop a chatbot that properly mimics human speech. In 1996, MIT professor Joseph Weizenbaum developed the first chatbot namely ELIZA, which was supposed to engage with persons like a therapist.*
4. What kind of questions should Syrene be able to answer?  
*Syrene should answer questions relating to mental health topics but can also answer basic questions like: "What is your name?"*
5. How Syrene would help users?  
*Syrene would record a patient's data. By doing this, a medical health professional can review these data to better assist the user/patient.*
6. Is Syrene multilingual?  
*No. Syrene is monolingual that can only understand English language.*
7. How does your chatbot work?  
*Syrene, our chatbot, could understand and assess the user's request, responding to queries in a more human-like manner. We use machine learning algorithms that enable Natural Language Porocessing (NLP) for the chatbot to have conversations via text and which will facilitate the dialogue and analysis of text conversations.*
8. Is there a log-in page?  
*No. This website doesn't have a log-in page. Just type in your name and it will directly go to our data-base.*
9. Can I find a specialist in this website?  
*No. This web application doesn't provide any contact from a specialist.*

**DISCLAIMER**

The “*About Us page*” is where to inform the users about the company’s goal and its operations plus the developers’ profile here are being displayed.

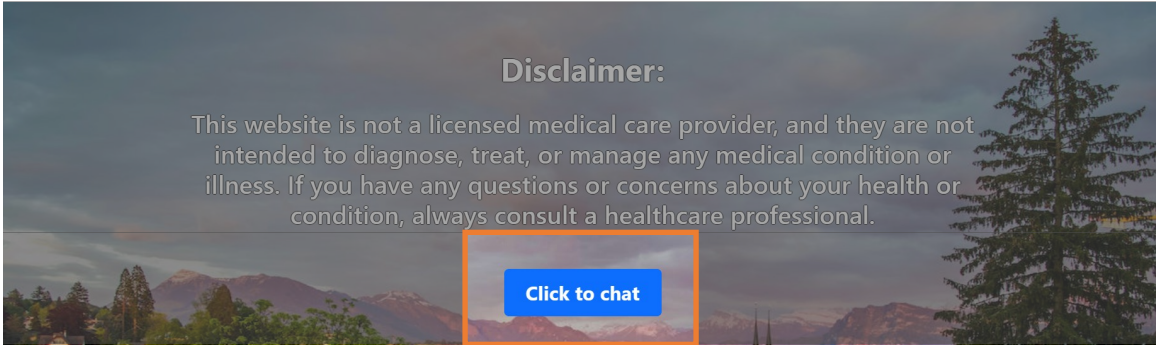

**Contact Page**  
The “*Contact Page*” is where you contact us when you have any concerns regarding with the web application .

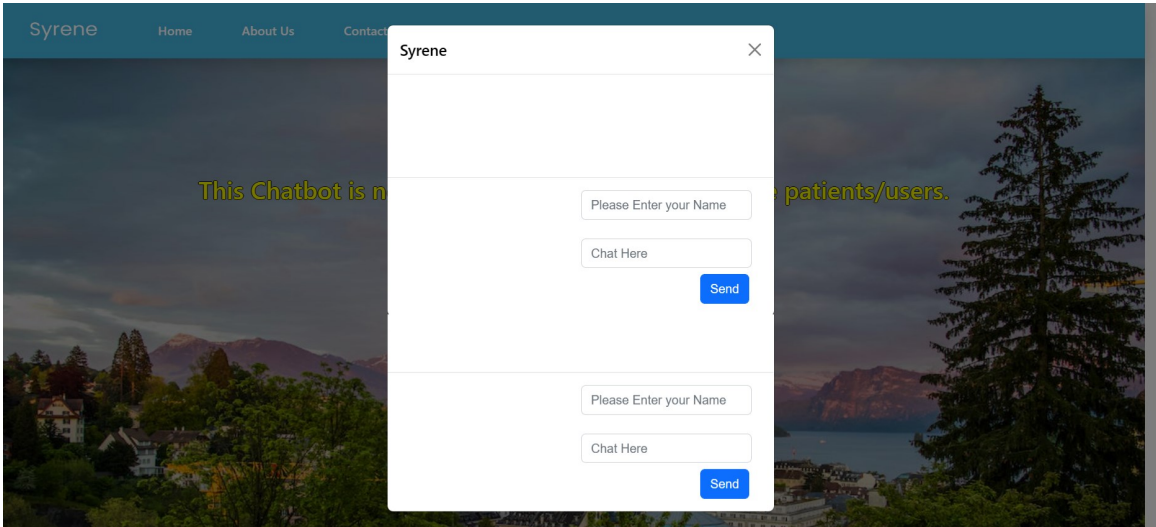

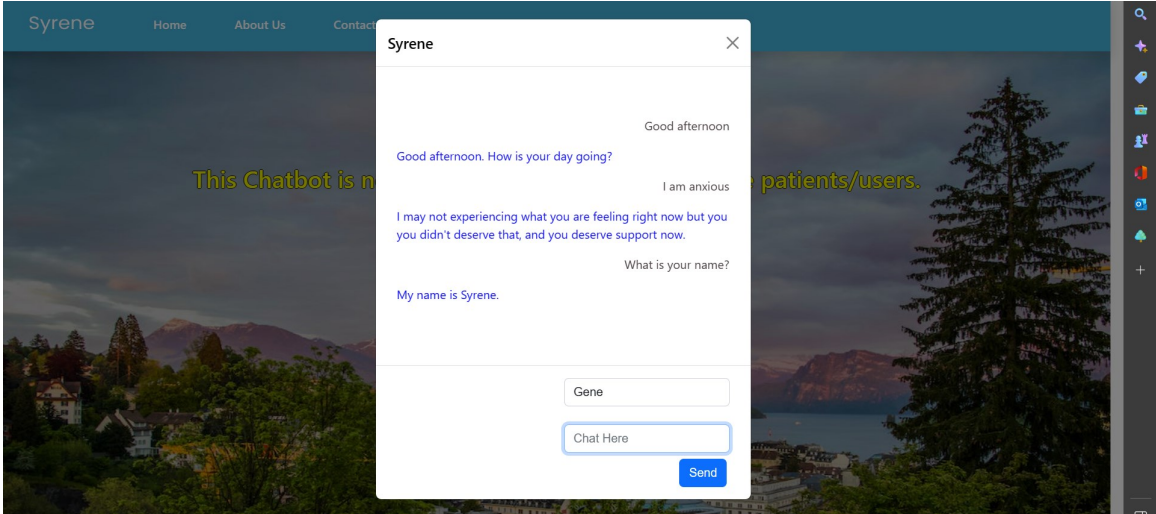

Click-to-chat Button

Click-to-chat button is where you will have your conversation with Syrene (chatbot). And once you click to chat, the chat box will appear for you to input your name and start your conversation with Syrene based on the image below.

Conversation with Syrene

This image shown above illustrates your conversation Syrene.

GETTING STARTED

Introduction

Welcome to Syrene! You are about to experience in having a conversation with the chatbot by text communication. Syrene is designed to collect data from users and give tips and advices relating to mental health topics. This User Manual (UM) contains all the detailed description of all the Syrene's features for the users to make full use of the system. We are sure you will find the system easy to use. Let's get started.

System Requirements

Before using the web application, make sure your device meets the following requirements:

- Windows 7 or higher version
- 32MB RAM (32-bit)/(64-bit)
- 500KB disk space
- Pentium 1 GHz or faster 32-bit (x86) or 64-bit (x64)
- DirectX 9 graphics processor with WDDM 1.0 or higher driver

Installation

Before running the web application, you must install the following files: This repo currently contains the starter files.

1st step: Clone repo and create virtual environment

```
$ git clone https://github.com/XyphrusCaguan/Thesis-Chatbot.git
$ cd Thesis-Chatbot
$ cd server
$ python3 -m venv venv
```

2nd step: Install dependencies

```
$ (venv) pip install Flask torch torchvision nltk flask-cors nanoid
```

3rd step: Install nltk package

```
$ (venv) python
>>> import nltk
>>> nltk.download('punkt')
```

4th step: Run

```
$ (venv) python train.py
```

5th step: This will dump data.pth file, and then run the following command to test it in the console.

```
$ (venv) python chat.py
```

DEPLOYMENT OF BACKEND AND FRONTEND:

#Server

```
$ cd server
$ .venv/Scripts/activate
$ (venv) python app.py
```

CLIENT and ADMIN

gitbash inside src folder of admin and client folders

Thesis-Chatbot\admin\src

Thesis-Chatbot\client\src

\$npm start

Deploy website in port 3000 for client and 3002 for admin in the default browser

How to Train Syrene

To train Syrene, you need to type in the terminal **python train.py**

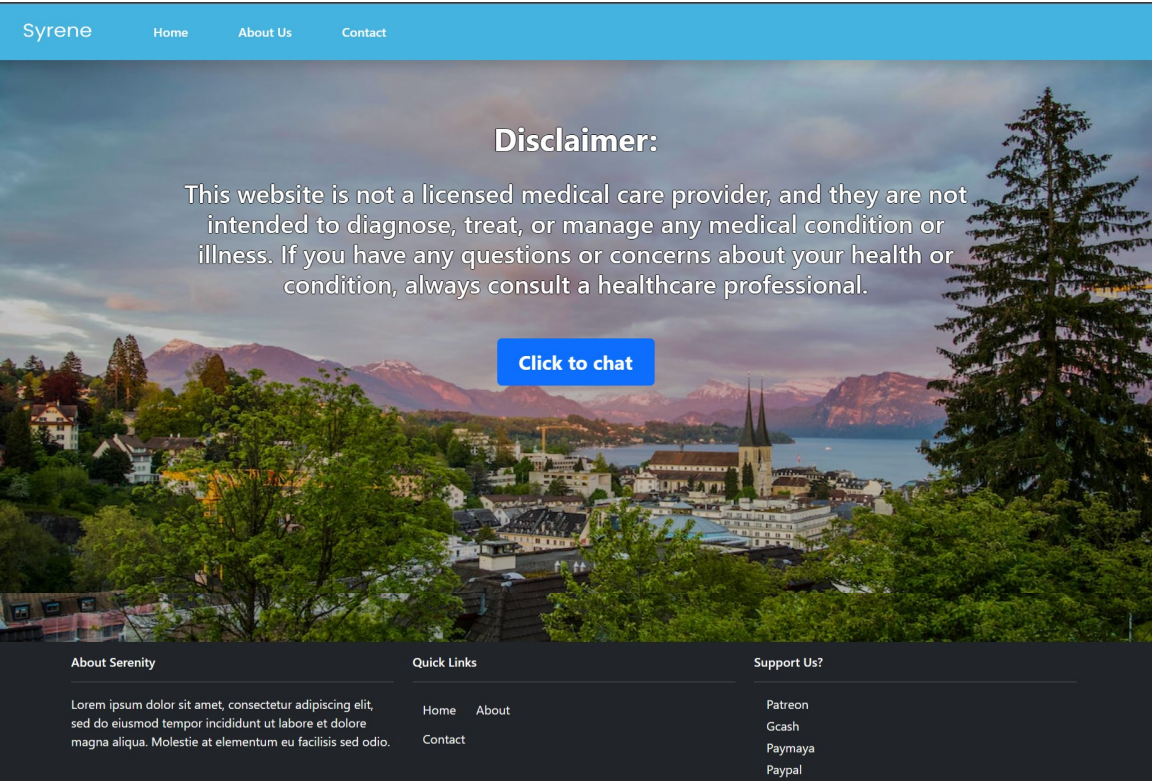

Training Results after:

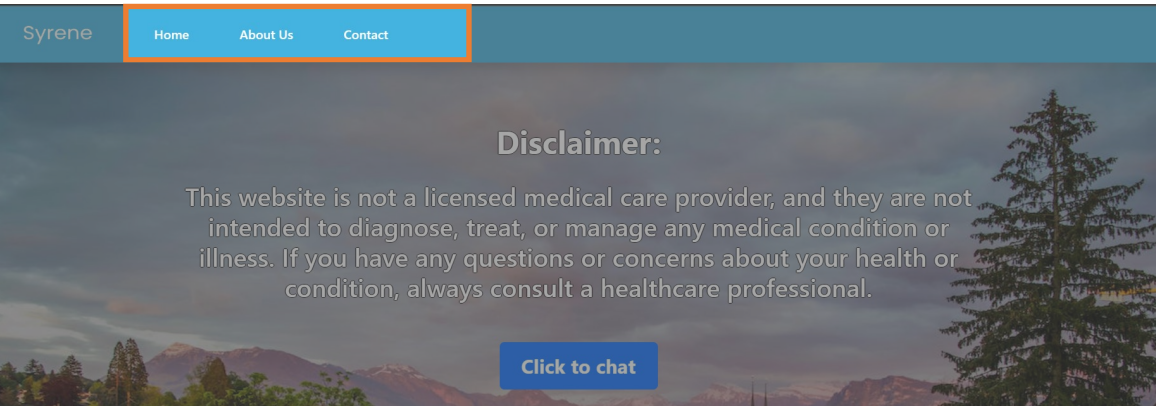

USAGE

Introductory Page (Home Page)

The “Home page” provides access to features. This homepage serves as the first initial representation of the web application. It gives a preview of the services available in this web application.

Navigation Bar

Navigation bar lets you navigates easily or browse through your web application effortlessly with just one click. The navigation bar contains “Home”, “About Us”, and “Contact”.
